## SECTION 4 – FIRST AID MEASURES

### Description of First Aid Measures

#### **After Inhalation:**

Remove to fresh air. Give artificial respiration if necessary. If breathing is difficult, give oxygen. Move exposed individual to fresh air. Loosen clothing as necessary and position individual in a comfortable position. Seek medical advice if discomfort or irritation persists.

#### **After Skin Contact:**

Flush with water for 15 minutes. Get medical assistance if irritation develops. Wash affected area with soap and water. Rinse thoroughly. Seek medical attention if irritation, discomfort or vomiting persists.

#### **After Eye Contact:**

Immediately flush eyes with running water for at least 15 minutes. Immediately get medical assistance. Protect unexposed eye. Rinse/flush exposed eye(s) gently using water for 15-20 minutes. Remove contact lens(es) if able to do so during rinsing. Seek medical attention if irritation persists or if concerned.

#### **After Swallowing:**

DO NOT induce vomiting. Dilute with water or milk. Get medical assistance. Rinse mouth thoroughly. Do not induce vomiting. Have exposed individual drink sips of water. Seek medical attention if irritation, discomfort or vomiting persists.

### Most important symptoms and effects, both acute and delayed:

**Acute:** Irritation. Nausea. Headache. Shortness of breath.

**Delayed:** None identified

### Indication of any immediate medical attention and special treatment needed:

If seeking medical attention, provide SDS document to physician. Treat symptomatically.

## SECTION 5 – FIRE-FIGHTING MEASURES

### Extinguishing Media

#### **Suitable extinguishing agents:**

If in laboratory setting, follow laboratory fire suppression procedures. Use water for fire presupposition.

#### **Unsuitable extinguishing agents:**

No information available.

### Special hazards arising from the substance or mixture:

Oxidizer: Contact with combustible/organic material may cause fire. Containers may explode when heated. This material will accelerate burning when involved in a fire.

### Advice for firefighters:

#### **Protective equipment:**

Use normal procedures. Poisonous gases may be produced in fire. Use protective clothing. Use NIOSH-approved breathing equipment.

#### **Additional Information (precautions):**

Move product containers away from fire or keep cool with water spray as a protective measure, where feasible. Thermal decomposition can lead to release of irritating gases and vapors.

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

### **Personal Precautions, Protective Equipment and Emergency Procedures:**

Wear protective equipment, Use appropriate NIOSH-approved respiratory protective device against the effects of fumes/dust/aerosol. Keep unprotected persons away. Ensure adequate ventilation. Keep away from ignition sources. Protect from heat. Stop the spill, if possible. Contain spilled material by diking or using inert absorbent. Transfer to a disposal or recovery container.

### **Environmental Precautions:**

Should not be released into the environment. Prevent from reaching drains, sewer or waterway. Collect contaminated soil for characterization per Section 13.

### **Methods and Material for Containment and Cleaning Up:**

Soak up with an inert absorbent material and containerized for disposal. If in a laboratory setting, follow Chemical Hygiene Plan procedures. Collect liquids using a vacuum or by use of absorbents. Place into properly labeled containers for recovery or disposal. If necessary, use trained response staff/contractor.

## SECTION 7 – HANDLING AND STORAGE

### **Precautions for Safe Handling:**

Wash hands after handling. Avoid contact with skin and eyes. Contact with metal, dust, or organic material may accelerate decomposition. Prevent formation of aerosols. Follow good hygiene procedures when handling chemical material. Do not eat, drink, smoke, or use personal products when handling chemical substances. If in a laboratory setting, follow Chemical Hygiene Plan. Use only in well ventilated areas. Avoid splashes or spray in enclosed areas.

### **Conditions for Safe Storage, Including any Incompatibilities:**

Store in a cool location. Provide ventilation for containers. Avoid storage near extreme heat, ignition sources or open flame. Store away from foodstuffs. Store in cool, dry conditions in well sealed containers. Keep container tightly sealed. Do not store near combustible materials.

## **Appropriate Engineering Controls:**

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use/handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor or mists below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above.

## **Respiratory Protection:**

Not required under normal conditions of use. Use suitable NIOSH-approved respiratory protective device when high concentrations are present. Use suitable NIOSH-approved respiratory protective device when aerosol or mist is formed. For spills, respiratory protection may be advisable.

## **Protection of Skin:**

The glove material has to be impermeable and resistant to the product/the substance/the preparation being used/handled. Selection of the glove material on consideration of the penetration times, rates of diffusion, and the degradation.

## **Eye Protection:**

Safety glasses with side shields or goggles.

## **General Hygienic Measures:**

The usual precautionary measures are to be adhered to when handling chemicals. Keep away from food, beverages and feed sources. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Do not inhale gases/fumes/dust/mist/vapor/aerosols. Avoid contact with the eyes and skin.
