###### **Pictogram:**

**Signal word:** Irritant.

##### **2.2 Label elements, including precautionary statements**

###### **Primary Routes of Exposure**

Ingestion: May cause gastrointestinal tract irritation with nausea, vomiting, diarrhea. May affect respiration (dyspnea, cyanosis). May affect behavior/central nervous system (ataxia).

Skin: Can cause mild skin irritation.

Eyes: Causes eye irritation.

Inhalation: Dust causes respiratory tract irritation. Symptoms may include coughing.

###### **Precautionary statement(s)**

IF INHALED: Remove to fresh air, if continued respiratory discomfort – consult physician.

IF INGESTED: Consult physician.

IF ON SKIN: Wash with soap and water.

IF IN EYES: Check for and remove any contact lenses. Flush with copious amounts of H<sub>2</sub>O, consult physician.

###### **Contra-indications:**

Should NOT be used in patients with a history of hypersensitivity to ester – type local anesthetics.

###### **Precaution:**

Avoid application to severely traumatized mucosal areas which are infected or areas of the posterior pharynx that might obtund protective reflexes. Local anesthetics should be used with caution in patients with drug sensitivity to ester type Anesthetics (procaine, benzocaine, or tetracaine).

###### **Medical Conditions Aggravated by Exposure**

Sensitivity/allergy to ester type anesthetics.

###### **Effects of Overexposure**

**Acute:** Material will anesthetize mucous membranes.

**Chronic:** Overexposure to vapors generated at high temperatures may result in eye and respiratory tract irritations.
