Description of first aid measures

General information:

Symptoms of poisoning may occur after exposure to dust, fumes or particulates; seek medical attention if feeling unwell.

After inhalation:

Take affected persons into fresh air and keep quiet.

If having difficulty breathing, contact emergency personnel immediately

In case of unconsciousness, place patient securely on side position for transportation.

After skin contact:

Remove contaminated clothing and wash before reuse.

Wash with soap and water.

If skin irritation occurs, consult a doctor.

After eve contact:

Hold eyelids apart and flush eyes with plenty of water for at least 20 minutes.

Seek medical treatment.

After swallowing:

Give large amounts of water or milk.

Do not induce vomiting; immediately call for medical help.

Information for doctor

Most important symptoms and effects, both acute and delayed: No further relevant information available. Indication of any immediate medical attention and special treatment needed:

No further relevant information available.

5. Fire-Fighting Information

Extinguishing media

Suitable extinguishing agents: Use fire-fighting measures that suit the environment. For safety reasons unsuitable extinguishing agents: No further relevant information.

Page 3 of 11

Special hazards arising from the substance or mixture:

As with most organic solids, fire is possible at elevated temperatures or by contact with an ignition source. Fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

Advice for firefighters

Special protective equipment for fire-fighters:

As in any fire, wear self-contained breathing apparatus pressure-demand (NIOSH approved or equivalent) and full protective gear to prevent contact with skin and eyes.

6. Accidental Release Information

Personal precautions, protective equipment and emergency procedures: Refer to section 8 **Environmental precautions:** No special measures required.

Methods and material for containment and cleaning up: Dispose contaminated material as waste according to regulations.

Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

Control parameters

Components with occupational exposure limits:

Federal guidelines suggest to treat the ingredient in this product as a nuisance dust, as no product specific guidelines have been issued for exposure.

Particulates Not Otherwise Regulated: OSHA (PEL/TWA): 10 mg/m3 (total dust); 5 mg/mg3 (respirable fraction)

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

7757-82-6 Sodium Sulphate

TLV Short-term value: NIC-0.2 mg/m³ thoracic fraction of aerosol

57-13-6 Urea

WEEL Long-term value: 10 mg/m³

Protection of hands:

Protective Gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/the chemical mixture.

Select glove material based on penetration times, rates of diffusion and degradation.

Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break-through time has to be determined and observed by the manufacturer of the protective gloves.

Eye protection:

Safety glasses

Have a safety shower and eyewash fountain readily available in the immediate work area

Body protection:

Protective Work Clothing

Limitation and supervision of exposure into the environment: None
